1 System Overview

1.1 Purpose

The purpose of the TicketSalad application is to provide users with a platform which they are able to spend a minimal amount of money in order to stand a chance to win a ticket valued at a significant amount with ease.

1.2 Project Scope

The TicketSalad system is a lottery based ticket platform. A user registers their email and credentials, they then purchase credits. Using these credits, user's can 'bid' on events displayed to them. When the user bids on an event they are required to input a 6 digit number. If the 6 digit number they input is the same number that the application randomly generated, the user wins the ticket.

1.3 Definitions, acronyms and abbreviations

- UML Unified Modeling Language
- CRUD Create Update Delete
- Credits Credits is a form of currency in the TicketSalad application used to bid on tickets. Credits are purchased using credit cards.

1.4 UML Domain Model

NEEDS TO BE DONE

2 Functional Requirements

2.1 Users

The TicketSalad application will have two users, namely a regular user and then an admin. The system should allow regular users to do the following:

- Register or log into the system.
- Edit/Update their info
- Purchase credits
- Bid for events

• View information on events.

The system should allow the admin user to do the following:

- Perform CRUD operations on all the available events.
- View statistics and data on all events
